(a) Excess of births over deaths. (b) Excess of arrivals over departures. (c) Includes natural increase and net overseas migration. (d) Includes adjustments of population between July, 1933 and June, 1954, on the basis of Census results. (e) Census 30th June.

POPULATION: STATES.

NOTE.—For dates subsequent to the Census of 30th June, 1954, the estimated population in each State represents the population ascertained at the Census, plus natural increase and recorded net migration into the State since the Census. As complete records of interstate migration are not available, the estimated State populations so derived are approximate, and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions were substantial after the Census of 1954.

VALUE OF RETAIL SALES IN AUSTRALIA(a): COMMODITY GROUPS.

The figures in the table below relate to goods (as distinct from services, accommodation, entertainments, meals, etc.) sold to the public by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards) and include the retail sales of establishments principally engaged in wholesale, manufacturing or servicing activities. The table contains particulars of retail sales of goods for the years 1949-50 to 1957-58 on a comparable basis throughout. The figures for the year 1952-53 were obtained from a Census taken in respect of that year, whereas figures for the other periods shown are estimates based on sample surveys. To provide comparability with the 1952-53 Census an adjustment has been made in the figures originally published for hardware, china and glassware for 1949-50 and subsequent periods.

WHOLESALE TRADE.

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, all goods sold by wholesale in Australia, including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

(a) Converted from original base, par values. The index numbers relate to the prices of ordinary shares on the Sydney Stock Exchange of principal companies (excluding banks) whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per £1 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. (b) Converted from original base, April, 1928. The index numbers are based on the prices of the ordinary shares of sixteen representative Queensland companies, and the preference shares of two companies whose ordinary shares are inactive. The index numbers represent unweighted averages. Mean monthly values are used. (c) These shares relate to leading companies and do not include bank shares or mining shares.

EXPORT PRICE INDEXES.

These index numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. In general the index numbers show price changes in the predominant market or markets for each commodity, but average prices realized for exports are used for some markets.

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the weights are the average annual exports of each commodity (production, in the case of gold) during the three years 1933-34 to 1935-36.

EXPORT PRICE INDEXES—continued.

RECENT TRENDS—EXPORT PRICE INDEX—WOOL AND "OTHER GROUPS".

Group indexes in the table on page 22 show the great fluctuations and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards have occurred in the price of wool. Since wool is a predominant export, and comprises 46 per cent. of the Base Aggregate of the index, fluctuations in wool prices obscure the effects which movements in prices of the other components have on the All Groups index. For purposes of comparison they are shown separately below.

NOTE.—The index numbers in the two preceding tables indicate satisfactorily the trends of export prices, but take no account of the relative quantities actually sold at the prices ruling during a month. The changing weights index numbers, shown below, take account of this factor. In computing these, the "quantity multipliers" are the quantities actually exported in the months (or periods) to which the index numbers relate. The index numbers for the most recent available month are :—

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(a) Special purpose index for the "Metals and Coal" group excluding coal and briquettes was 410 for June, 1959 and for the year 1958-59, 407. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in prices of all imports. (c) NOTE.—During 1956 these indexes were reconstructed from the base period by excluding potatoes and onions. For June, 1959, index numbers for these groups comparable with the previous indexes including potatoes and onions were :

"Foodstuffs and Tobacco," 335; "Goods Principally Home Produced," 362; "Total All Groups," 339. For the year 1958-59, they were : "Foodstuffs and Tobacco," 330; "Goods Principally Home Produced," 356; "Total all Groups," 334.

"C" SERIES RETAIL PRICE INDEX AND WAGE RATE INDEXES.

In the tables on this page and page 29 the index numbers have been converted arithmetically to the base, Average of 3 years ended June, 1939 = 1,000, in order to facilitate comparisons with other data. The absolute index numbers differ, in consequence, from those appearing in other publications of the Bureau.

INTERIM RETAIL PRICE INDEX.

The list of items covered by the Interim Index is representative of a high proportion of expenditure of wage earner households. It is more comprehensive than that of the "C" Series Index and some of the principal food weights and group weights differ substantially from those used in the "C" Series Index. The weighting pattern and the list of component items of the "C" Series Index relate to the pre-war pattern of wage earner expenditure and consumption, whilst those of the Interim Index relate to the consumption pattern of 1950-53.

FARM PRODUCTION PRICE INDEXES.

The annual index numbers shown in the following table relate to average "prices" of farm products realized in the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The index numbers for any year relate to the average values of farm products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The index numbers shown below are the Revised Series (December, 1952) in which average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights.

The preliminary index numbers for 1957-58 are based mainly on the recorded or estimated movement in average values for the major farm products. They will be reviewed from time to time as further "price" data become available.

AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS.

The following figures are derived from employment and wages recorded on Pay-roll Tax returns (which cover approximately 73 per cent. of the estimated number of civilian wage and salary earners in employment), from other direct collections and from estimates of the unrecorded balance. Pay of members of the armed forces is not included. The figures are not seasonally adjusted. A seasonally adjusted quarterly index of average weekly wage earnings is published on page 2.

(a) Includes the Australian Capital Territory. (b) Includes the Northern Territory. (c) Total wages as above divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State and, because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE.—Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

(a) Registration in Victoria is according to purpose of use and not type of vehicle ; consequently motor car registrations are overstated by the inclusion of commercial vehicles, registered for private use. Prior to 12th November, 1951, primary producers' private cars registered in Victoria were included in commercial vehicle registrations. (b) Excludes the Northern Territory. (c) Includes taxis and hire cars in Victoria. (d) Includes some new registrations effected in preceding months but not passed into central registration records until subsequent months.

NOTE.—Particulars of New Motor Vehicles registered, as shown above, are compiled by the Registration Authorities in each State, and, because of the factors referred to in note (a) and for other reasons, differ from those published in the Monthly Bulletin of Registrations of New Motor Vehicles and the Monthly Press Statement.

(a) General Banking Division of Commonwealth Bank prior to 3rd December, 1953. (b) At the beginning of July, 1952, the General Banking Division opened, in the books of the Central Bank, a special deposit account with a balance approximating the amount that would be required if it were subject to Special Account provisions of the Banking Act 1945. This represents a change in the form of liquid assets which were previously held, predominantly, in Treasury Bills. (c) Between March and July, 1952, certain loans to building societies and *crédit foncier* loans for housing were transferred from the General Banking Division to the Commonwealth Savings Bank in exchange for Government Securities. The reduction in these loans (held by the General Banking Division) over this period was approximately £24,000,000. (d) Banks were exempted from furnishing a return for the fourth Wednesday.

(a) Represents the combined transactions of the Consolidated Revenue Fund and the Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Trust Section of the Maritime Services Board—included in the annual Budget Papers. Adjustments have been made to exclude duplications.

(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of the interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
